

NEW INCINERATING TOILET

FLAME 8000

New Flame 8000

Flame 8000 have been changed on many different points. Operating and simplicity has been set higher than ever. In terms of design, stability, comfort and use, it is the equal of a modern WC, with a capacity for 6 persons. The built-in fan expels odours and moisture from the toilet and bathroom. Flame 8000 can be installed in both warm and cold locations, and will work perfectly well irrespective of the room temperature. It can be placed according to your needs and are not needed to fasten to the wall or floor.

The new circuit board has changed to include more languages. It informs the user when the potty needs to be empty and when the toilet need to be run for a cleaning program. The running time is also appearing in the display. Flame 8000 has a large and a small program to reduce energy consumption as much as possible. If the user wants to extend the combustion time, he can also do that in the menu. The ashes can be used in the garden as a fertilizer.
